

## Easy Set-Up and Access

The application is web based so once you decide to use the application on your study, ICON can activate the relevant accounts quickly and easily. Access is granted on a name only basis enabling access to only those who really need to see the data.

With IMRA, ICON's Study Physicians now have even better tools at their fingertips, including:

## Up-To-Date Alert Overview

Quickly highlight, group and chart out-of-range laboratory results by alert grade to aid in the detection and monitoring of potential laboratory safety signals.

## Intuitive Data Trending

Using a variety of filters to specify the exact data of interest, the study physician can plot the data by median, mean or quartiles, across all visits to take an even closer look at any potential emerging trends. Outliers can be immediately identified for closer medical inspection.

**Alert Follow-Up** - Rapidly locate an alert of interest and immediately view the outcome of any follow-up data on each subject, if available.

**Detailed Subject Profiling** - Review a subject's full laboratory history and plot multiple tests of interest, simultaneously, a must-have feature for the medical review of any subject.

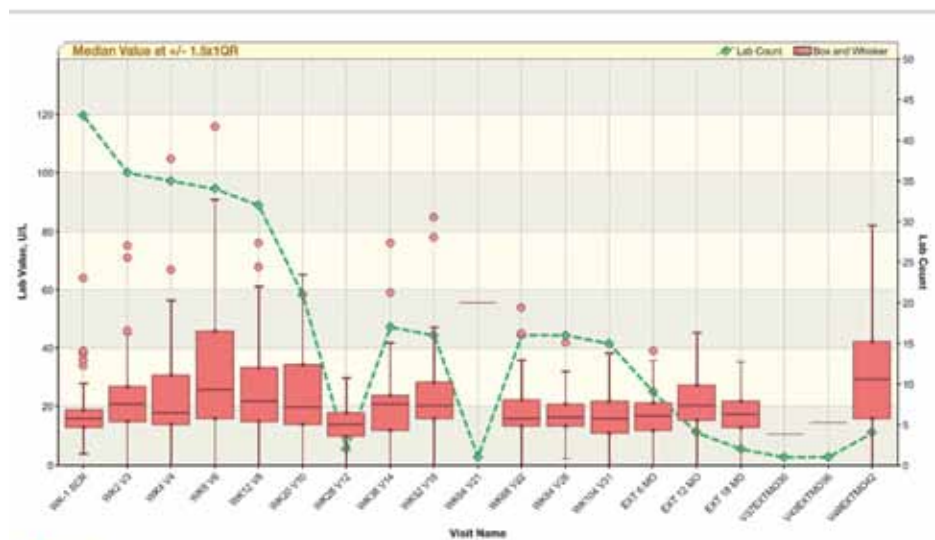

**Comprehensive Data Export** – Exports the data of interest to Microsoft Excel™ or PDF.

**ICOLabs™ IMRA** can be purchased as a stand alone application to support review of ICON Central Laboratories data. However ICON can also support you with a team of experienced clinical research physicians who can monitor, interpret and report on the data. Our Medical and Safety Services group can provide highly responsive, multilingual customized services from small studies to complex multinational projects.

The **ICOLabs™ Medical Review Application** is just one of the many innovative ways we are bringing the full range of ICON's resources to our clients to provide enhanced study management services and greater overall value. For more information regarding how ICON can offer a more comprehensive solution for your next clinical trial, please contact us at: [labinfo@iconplc.com](mailto:labinfo@iconplc.com) or visit [www.iconplc.com](http://www.iconplc.com).
